

HR Solutions

Solution:

- Time Attendance
- Access Control
- Job Costing
- Canteen Management
- Siren
- Patrol Guard Control

Time & Attendance and Canteen Management System keep tracking of employees' attendance allow to manage, monitor and produce reports of employee's attendance. Output in various formats for use in existing payroll software.

Access Control System protects to access allotted rooms by technology like Bar-coded, Proximity, Smart Cards as well as Biometrics Finger Print Unit provided centrally managing software

Job Costing is an unique feature which will help the management to track the jobs done by an particular employee along with the quality of the JOB.

All the industries have Siren which is manually pressed by the security person at the shift end, this can be automated using Synel products. The same can be used for any other applications like T&A, Access Control, Canteen Management etc.,

Guard Patrol Control System is used based on RFID technology; it helps to watch over the employees that have difficulties to track whose working duties require moving from one place to place.
