

Market:

- Pathological Labs
- ◆ Hospitals
- ◆ Blood Banks
- ◆ Medicine Dispensing
- ◆ Satellite Clinics
- ◆ Inventory

Products Used:

- Portal Data Terminals
- ◆ Thermal Transfer Printer
- ◆ Barcode Generation Software.

More and more hospitals today are embarking on the Technology path to streamline their internal operations, improve efficiency, reduce errors and hence result in overall "Patient Satisfaction". Bartronics India has identified the following functional areas where AIDC can be deployed in a hospital:

- ◆ Admissions
- ◆ Laboratory
- ◆ Emergency Rooms
- ◆ Blood Banks

Auto Identification and Data Collection using Bar-coding technology, mobile computing and wireless technology enabling the access to the fast, accurate and online information led the healthcare industry to

- ◆ Streamline its existing procedures
- ◆ Improve efficiency in operations
- ◆ Reduce operational cost.
- ◆ Enhance promptness in service delivery.

Once deployed in these areas, the Barcodes can help track patient records, specimens, blood samples etc and thus leading to a fast and error free system.

We feel that in a "Life Saving" set up like a hospital, it is absolutely critical to have a fast. processing set up which reduces the chances of errors (almost up to 0%).
