

Inventory Management System

Markets:

- ◆ Industrial Houses
- ◆ Public Distribution Centers
- ◆ Engineering products manufacturing companies.
- ◆ Textile Manufacturing Companies
- ◆ FMCG Companies

Product Used:

- ◆ Barcode Printer
- ◆ Portable Data Terminals
- ◆ Barcode Generation Software

Bartronics has Developed and Implemented Barcode Based Inventory Management System for various prestigious Business Houses to manage their stores Activity.

The clients include prestigious names like Tata, Mahendra & Mahendra, Hindustan Lever, Crompton Greaves etc.

Advantages:

- ◆ No manual intervention, complete accurate data generation.
- ◆ Fast and efficient movement of stores
- ◆ Total integration into SAP/ERP
- ◆ Improved control over stock, warehousing and distribution of products.
- ◆ Fast and accurate information dissemination of the shipment.

The Incoming material is first barcoded by sticking a barcode that is generated by a barcode printer (If it is not already barcoded by the manufacturer)

The barcode is scanned by a mobile computer and the information about the material is uploaded to the host computer thereby the incoming data is created.

While issuing data to an user the barcode is read once again and the out going data is created.
